Seminar on Optimization and Control in Physiological Systems

Control of Respiration During Rest and Exercise

Daniel Schneditz

SFB F003 "Optimization and Control"

Graz, May 29, 2001

Steady-State Quantities in the Respiratory System 2
Regulation of Respiration 5
- The Respiratory Center 5
- Chemical Control of Respiration 6
- Voluntary Control 9
- Irritant Receptors in the Airways 9
- J-Receptors 9
- Anesthesia 9
- Other Factors Affecting Respiration 9

Determinants of Ventilatory Instability and Variability 11
- Mechanisms of Ventilatory Variability 12
- Methods for Assessing Stability 12

Regulation of Respiration During Exercise 16
- What is it during exercise that causes the intense ventilation? 16
- Limitations to O_2 Uptake During Dynamic Exercise 17
- Symmorphosis (Weibel & Taylor 1981) 18
- Limitations in the Respiratory System 19
- Why Does Ventilation Become 'Inadequate'? 20
- Alveolar to Arterial Oxygen Transfer 21

Bibliography 23
